## WORK EXPERIENCE

### [Intuit \(QuickBooks\)](#)

Senior Software Engineer

Aug 2023 - Present

- Built a feature-rich proposal editor (React, TypeScript) with seamless HTML-to-PDF conversion (Java, Spring Boot), driving a 70% increase in job win rate for 50K+ beta users
- Designed customer portal powering 5K+ e-signatures monthly — wrote technical spec, deployed net-new web app, and aligned engineering, legal, and security stakeholders
- Led technical planning for post-invoice surveys initiative — breaking a monolithic release into 4 parallel workstreams to reduce risk and ship incrementally over 6 weeks

### [Bonfire](#)

Founding Engineer

Mar 2022 - Aug 2023

- Owned creator subscription and fan notification initiative end-to-end — from spec & data modeling to core UI — driving a 22% average increase in creator site traffic
- Designed Ethereum wallet account abstraction combining passwordless signup with self-custodial authentication (Ethers.js, Magic), onboarding 1,000+ creators and fans
- Architected the team's job server (Express, tRPC, BullMQ, Redis) that enabled long-running tasks and resilient, event-based APIs for the creator platform

### [Mailchimp](#)

Software Engineer III

Apr 2021 - Feb 2022

- Led a squad of 3 engineers to build a partner referral system (Go, Dataflow) that generated \$250K+ in payouts in its first six months

Software Engineer II

Jun 2019 - Apr 2021

- Implemented the data pipeline for a learning management system (Go, gRPC, Protobuf) to asynchronously ingest and update partner certifications (Pub/Sub, Spanner)

## PROJECTS

### [Second Generation](#)

Founder

Sep 2020 - Present

- Operate a crypto staking platform with \$150K+ in assets, providing Ethereum staking infrastructure with 99.78% uptime over the last 5 years
- Implemented portfolio web application (Next.js, React, TypeScript) with automated staking, market dashboards, and real-time reward event ingestion (BullMQ, Redis)

### [APM Map](#) (Acquired)

Co-Founder, CTO

Jun 2020 - May 2023

- Designed and implemented an interactive directory of 100+ product management learning resources serving thousands of aspiring PMs; acquired by Exponent in 2023

## EDUCATION

Columbia University, B.A. Computer Science & Psychology

2019

Awards: Palantir Future Scholarship (2018), Code2040 Fellowship (2018), QuestBridge College Match (2015)

## SKILLS

Programming Languages: JavaScript, TypeScript, Java, Kotlin, Go, PHP

Technologies: React, Next.js, Node.js, Spring Boot

Spoken Languages: English (Native), Spanish (Native)
